

# Updating Your CapTel 840i Phone

Occasionally, changes are made to the *CapTel* 840i software. Your phone can check whether new software is available and then perform an update as needed over the Internet connection.

**NOTE:** *Software downloads are encrypted for maximum security.*

To update your *CapTel* 840i software:

1. With the handset hung up, press the **YES** button to see the Options menu.

2. Press the **DOWN** arrow button repeatedly until **Settings** is highlighted.

Press the **YES** button to select.

3. Press the **DOWN** arrow button repeatedly until **Update Phone** is highlighted.

Press the **YES** button to select.

4. Press the **YES** button to begin updating your phone, or press the **NO** button to exit.

5. The *CapTel* phone checks to make sure that your software is up to date. If a new software version is available, your *CapTel* phone updates to the most current version, then resets (reboots) itself so you are ready to make calls.
